PROFESSIONAL SUMMARY

Informatics Engineering final-year student and Apple Developer Academy learner building iOS apps in Swift and with on-device ML. Backed by a machine learning foundation and one year of fintech product experience at M-DAQ Global. Seeking product related roles.

EDUCATION

Universitas Padjadjaran Aug 2022 – Present
Bachelor of Informatics Engineering *Jatinangor, Indonesia*

- **Cumulative GPA:** 3.88/4.00
- **Relevant Modules:** Project Management,

EXPERIENCE

Apple Developer Academy @ Infinite Learning Feb 2026 – Present
Learner *Batam, Indonesia*

- Design and build iOS apps in teams through Challenge-Based Learning (Engage–Investigate–Act)
- Collaborated in cross-functional teams of developers and designers, managing app delivery timelines from initial ideation to working SwiftUI apps.

M-DAQ Global Aug 2025 – Aug 2026
Product Management Intern *Remote*

- Designed reference UI components and user flows for financial ledger reconciliation
- Developed an n8n automated document extraction pipeline to streamline KYC/KYB compliance verification, reducing previous automated document review time by 40%.

Bangkit Academy led by Google, Tokopedia, Gojek & Traveloka Sep 2024 – Dec 2024
Machine Learning Cohort *Remote*

- Selected among 45,800 applicants (10% acceptance rate) and completed 900 hours data science curriculum.
- Earned Distinction Status as one of the top 197 graduates out of 4,600 machine learning cohorts.
- Awarded Best Capstone Project for developing an ML-driven solution with Evomo (Telkom startup).

PROJECTS

Baur – Indonesian Regional Culture Learning App (iOS) Jul 2026 – Sep 2026
Developer *Team of 10*

- Interviewed young adults on navigating unfamiliar cultural norms and turned findings into user needs
- Designed video-based storytelling with gesture interactions and cultural
- **Tech Stack:** SwiftUI, SwiftData, AVFoundation, CoreMotion

Power Smart – IoT Energy Anomaly Detection (Bangkit Capstone with Evomo) Oct 2024 – Dec 2025
Machine Learning Engineer *Team of 5*

- Built and compared Isolation Forest and LSTM-autoencoder anomaly detectors on IoT energy data usage.
- Preprocessed time-series data and deployed the model on cloud using Python and TensorFlow.
- **Tech Stack:** Python, TensorFlow, Google Cloud Run

HONORS AND AWARDS

Received Funding for Student Innovation Programme Nov 2023
Issued by Ministry of Education, Research, and Technology

- Awarded to 5,102 teams among 42,368 teams.
- Innovated stress detector using gloves equipped with sensors and received funding of 8.5 million rupiah.

United Nations Volunteer Mar 2025 – July 2025
Machine Learning Training Support

- Taught machine learning basics to 30 students in Ethiopia.
- Collaborated with a global team of educators to improve curriculum and share teaching resources.

SKILLS & LANGUAGES

- **Programming Languages:** Swift, Python
- **Frameworks & Libraries:** SwiftUI, CoreML, TensorFlow
- **Tools:** Xcode, Figma, Jira, Jupyter Notebook
- **Languages:** English (Proficient), Indonesia (Native)
